

Haven Greens Launches Crunch Salad Kits Made with Ontario-Grown Greens

Three bold, flavour-packed kits bring restaurant-quality salads home in seconds

King Township, Ontario – May 12, 2026 – [Haven Greens](#), Canada's first fully automated greenhouse, is expanding its lineup of locally grown leafy greens products with the launch of its new ready-to-eat Crunch Salad Kits. Made with pesticide-free Ontario greens, premium toppings, and a boost of protein, each kit is designed for unparalleled freshness, crunch, and flavour.

"From day one, our focus has been on revolutionizing what local produce can look and taste like in Canada," said **Jay Willmot, CEO and Founder of Haven Greens**. "Our new salad kits take that vision even further, delivering a convenient, high-quality option that fits seamlessly into Canadians' daily routines without compromising on flavour or freshness."

A New Standard for Fresh, Convenient Meals

Haven Greens Crunch Salad Kits offer a satisfying meal or standout side that's ready in seconds, no washing, chopping, or prep required. Each kit delivers a balance of texture and flavour, combining crisp greens with restaurant-quality toppings such as roasted chickpeas, puffed quinoa, and crunchy garnishes, paired with thoughtfully crafted dressings.

The lineup includes:

- **Caesar Crunch** – A modern take on a classic, featuring shaved Parmesan, roasted chickpeas, crouton crumbles, and a silky, perfectly balanced Caesar dressing.
- **Fiesta Crunch** – A bold, flavour-forward mix with Cotija cheese, tortilla strips, sweet corn, and a smoky chipotle dressing.
- **Sesame Crunch** – A bright, satisfying option combining crispy wontons, roasted edamame, sliced almonds, and a sesame ginger dressing.

Locally Grown, From Farm to Fork

Alongside Haven Greens' other products, the greens in the Crunch Salad Kits are grown locally in the Greater Toronto Area within a fully automated, climate-controlled greenhouse. Finely tuned to yield over 11,000 pounds of lettuce daily, Haven Greens is giving Canadians access to consistently fresh leafy greens year-round.

With plans to double its five-acre facility to ten acres to meet Canadians' demand for leafy greens, and currently on track to reach net-zero operations by 2027, Haven Greens is continuing to work towards creating a healthier, sustainable, and scalable food system to feed all Canadians.

Haven Greens Crunch Salad Kits are now available at select retailers across Ontario, including Summerhill Market and Fortinos, as well as Calgary Co-op locations in Calgary. Additional retailers are confirmed to launch throughout the summer and beyond.

About Haven Greens

Haven Greens is revolutionizing the greenhouse lettuce industry with its state-of-the-art, climate-controlled facility located at Kinghaven Farms in King City, Ontario, just outside of Toronto. Offering pesticide-free, locally grown lettuce, Haven Greens guarantees every leaf is consistently crunchy, sweet, and ready-to-eat with no washing required. With year-round production and daily harvesting, Haven Greens' lettuce stays fresh longer and offers unparalleled quality. Launched in February 2025, the company aims to supply fresh, sustainable, and high-quality leafy greens to the food service and retail sectors across Ontario and North America.
